🎓 EDUCATION

08/2024 – present Tilburg, Netherlands	Pre Master of Data Science and Society Tilburg University
08/2018 – 06/2022 Beijing, China	Bachelor of Law Peking University

🧠 SKILLS

Programming Languages

Java, Python, JavaScript,
HTML, CSS, SQL

Frameworks

Spring Boot, Django, Vue

Tools & Databases

Git, Maven, Apifox, MySQL,
MyBatis

📁 PROJECTS

Gitlet – A Mini Version Control System

Java (CS61B Project)

- Built a simplified Git-like version control system with commands such as init, add, commit, branch, and merge; supported command-line interaction through argument parsing
- Used SHA-1 hashing and tree-based commit structures to track file history and implemented persistent storage via Java serialization

Compatibility Web – Enigma x Megekko Hackathon Project

Python, Django (Hackathon Prototype)

- Designed a prototype web application that suggests compatible hardware components for custom PC builds.
- Built backend logic for matching products based on specifications; implemented simple frontend pages using Django templates.

Scheme Interpreter – Educational Programming Project

Python (CS61A Project)

- Implemented a simplified Scheme interpreter including parsing, evaluation, and environment management.
- Strengthened understanding of functional programming paradigms and recursion through practical application.

👛 PROFESSIONAL EXPERIENCE

08/2023 – 12/2023
Beijing, China

LegalNow AI
Intern

- Designed and evaluated prompt templates for legal document understanding and Q&A tasks using LLMs; conducted both manual and scripted quality checks
- Created CLI usage guides and trained team members in basic command-line workflows to improve internal tooling efficiency
